

MAILING OUT OMVIC CERTIFICATES

The new MVDA prohibits OMVIC from renewing a registration unless certain prescribed conditions are met (e.g. no retail sales tax arrears, no money owing to the Compensation Fund, OMVIC certification course requirements satisfied).

Although processing of your renewal begins when your application is received, OMVIC's system is currently set up to print your certificate immediately before your expiry date to ensure these preconditions have been met.

To avoid having your renewal refused, and ensure the processing of your renewal is completed before your expiry, all registrants are strongly encouraged to send in renewals well in advance of the expiry date and to double check that any precondition issues have been resolved.
