

## OMVIC CERTIFICATES

The new MVDA prohibits OMVIC from renewing a registration unless certain conditions are met (e.g. no retail sales tax arrears, no money owing to the compensation fund, OMVIC certification course requirements satisfied).

Although processing of your renewal begins when your application is received, OMVIC's system is currently set up to print your certificate immediately before your expiry date to ensure these preconditions have been met.

As a result, in many cases, certificates are being received following expiry. In these cases, the Ministry of Transportation issuing offices have agreed to give registrants an extension to provide their OMVIC certificate.

To ensure any precondition issues are resolved and to ensure processing of your renewal is completed before your expiry, all registrants are still encouraged to send in renewals well in advance of the expiry date.
